

Novell® GroupWise® 6.5 for Linux

Communicating with Security, Control and Mobility

www.novell.com

PRODUCT FLYER

Novell® GroupWise® 6.5 for Linux*—a member of the Novell Nterprise™ family of solutions—brings the industry's premier communication and collaboration tool to Linux. It provides an effective and innovative approach to collaboration services—an approach that delivers security and mobility, while reducing the cost of managing communication and collaboration services.

COMBINE THE ADVANTAGES OF LINUX AND GROUPWISE

Many organizations are moving to Linux and the open source computing environment to take advantage of the increased flexibility and lower total cost of ownership they offer. Now, GroupWise 6.5 is available on Linux, supporting both SUSE* and Red Hat* Linux, the two leading Linux distributions. What's more, Novell has recently acquired SUSE Linux, making Novell the only vendor that sells and supports a world-class, Linux-based collaboration solution and also the underlying Linux operating system.

If you are considering a move to Linux, you can enjoy the same rich GroupWise functionality that NetWare® users have been enjoying for years. And you can move forward with confidence, knowing that you can get the support you need from Novell and its partners, whenever and wherever you need it, around the globe.

RAISE THE BAR ON SECURITY AND AVAILABILITY

GroupWise 6.5 for Linux delivers field proven security and resiliency. By moving to GroupWise 6.5 for Linux, you can dramatically reduce security risks and improve availability. You'll enjoy secure, authenticated communications—including instant messaging—with organizations and individuals both inside and outside your firewall. GroupWise 6.5 for Linux also provides tight integration with leading anti-virus and anti-spam solutions. Working with partner products, it detects and eliminates viruses and provides spam control. So you can reduce the risk of damage from viruses and the loss of productivity through e-mail overload.

Built-in redundancy features, such as LDAP pooling, keep essential services available even when system glitches or hardware failures occur. So your users stay productive and user satisfaction increases.

N

*Thousands of organizations
worldwide rely on*

GroupWise to:

- *Work smarter and work together*
- *Stay connected while ensuring security*
- *Improve access and control*
- *Break down information barriers and cut costs*

Novell®

WORK SMARTER. WORK TOGETHER.

GroupWise 6.5 for Linux expands the scope of collaboration, enhancing productivity across the Net. Its broad feature set includes integrated e-mail, instant messaging and scheduling, as well as task management. New tools help people manage their day-to-day activities more efficiently—organizing information in the way that best suits their preferences and working style.

GroupWise 6.5 for Linux works across Web-based and wireless as well as traditional clients. Extensive mobile capabilities allow people to access resources with the type of device they prefer, whether that be a desktop or laptop computer, an Internet kiosk or one of the increasingly popular mobile devices, including Nokia* and Ericsson* cellular phones and handheld devices such as PalmPilot*, Pocket PC and RIM BlackBerry*. GroupWise 6.5 for Linux includes GroupWise Messenger, a secure instant messaging capability that dramatically enhances interaction among geographically dispersed teams without jeopardizing the security of information behind the firewall.

REDUCE OWNERSHIP COSTS

With its enhanced administrative tools, integration through open standards, scalability and flexible pricing options, GroupWise 6.5 for Linux gives you the best in communication and collaboration capabilities while minimizing the cost of implementing, managing and maintaining a high-performance system. Advanced technologies allow you to support a large number of users on a

single server, reducing hardware acquisition and management costs. Industry leading administrative tools enhance productivity and reduce the cost of system administration.

As your organization evolves—whether through mergers, acquisitions, divestitures or internal consolidation—GroupWise 6.5 for Linux smoothes the transition by enabling administrators to add and move blocks of users quickly and efficiently. Bottom line: GroupWise 6.5 for Linux reduces your total cost of ownership and improves your return on investment in communication and collaboration services.

SUPPORT REGULATORY AND LEGAL REQUIREMENTS

In today's legal and regulatory environment, you need to respond immediately to requests for information contained in your e-mail system. GroupWise 6.5 for Linux helps you meet regulatory requirements and support your corporate counsel in legal actions. Complementary solutions from Novell partners enable you to search your message store for specific words, phrases or attachments to locate essential information quickly.
